## CONTENTS

### RISS Reports

Alterations of Major Regional  
Actors' Stances in the Course of Syrian Crisis.

The report observes the regional countries' approaches to the conflict in Syria and reasons for their stances alterations over its duration. The authors study various military-political and economic aspects of the changes ensued.

Keywords: *Middle East – war – oil – gas – economy – the Gulf monarchies – Egypt – Iraq – Israel – Jordan – Lebanon – Iran – Turkey – Algeria – Tunisia – Libya – Morocco – Mauretania* ..... **13**

### International Policy

*Kryachkina Y. A.* Japan's Role in the Asia-Pacific  
Integrational Processes.

The modern dynamics of Asia-Pacific integrational processes induces the Japanese authorities to alternate their former attitudes to them. Against the background of the USA distancing itself from the regional associations, Tokyo has gained a higher profile in development of regional integrational organizations. Thus, S. Abe's government aspires to maintain Japan's status as a regional power, deterring China's further extension of influence and also striving to improve the Japanese economic conditions.

Keywords: *Asia Pacific – Japan – regional integration – China – the Republic of Korea – Asia-Africa growth corridor* ..... **48**

*Svedentsov V. L.* The Philippines' Policy Under Rodrigo  
Duterte's Presidency.

The article analyses the Philippines' foreign policy during 2016–2018 under R. Duterte, who strives to distance his country from its traditional commitment to the USA towards a more nuanced foreign relations, developing ties with Russia and China. The president has encountered a strong resistance from much of the national political and military establishment on his way.

Keywords: *South China Sea – the Philippines – China – the USA – R. Duterte* ..... **60**

*Yakimova E. A.* Israeli Assessments of the Current State and Prospects for Relations with Iran after President H. Rouhani's Reelection.

The author aspires to reveal some specifics of the Israeli approaches to relations with Iran after H. Rouhani's reelection as a president of the IRI. She analyses the Israeli assessments of the Iranian pre-election situation, observes main bilateral fields where collision of interests are fraught with direct or indirect conflicts. The situation around the JCPA and its possible repercussions on the bilateral antagonism are also noted here.

Keywords: *Israel – Iran – the JCPA – proxy conflict – social unrest – elections* ..... 75

*Sharafetdinova A. I.* Perceptions of Modern Russia's Policy by the DPRK: Evaluations and Judgements.

The current Russia–North Korea bilateral relations are characterized by Russia's strengthening position as a mediator in the DPRK's negotiations with the international community. The North Korean leadership claimed in 2018 that the exacerbated situation around the Korean Peninsula necessitates a deeper cooperation and enhanced strategic communication between Moscow and Pyongyang. The reinvigoration of bilateral ties has come into place of the previous restraint since 2009, against a background of multiple senior level dialogues between the DPRK and China, the Republic of Korea, and USA. It has led to a more thoughtful perception of the Russian policy by the North Korea.

Keywords: *Russia – the DPRK – Kim Jong-un – North Korea's nuclear program – sanctions – denuclearization* ..... 92

## **New Eurasia**

*Kukol S. Y.* The European Union – Uzbekistan Cooperation: the Current State and Future Prospects.

Uzbekistan's new president has recently energized the national foreign policy, emphasizing closer bilateral ties with the EU. Therefore, the article notes the key role of the Partnership agreement of 1996 and the parties' continuing aspiration for a treaty of deeper cooperation. The bilateral humanitarian, economic, political contacts and security sphere engagements are observed here. Basing on the Uzbek and the EU authorities' official statements, the author comes to deduction that the parties' economic and political motives prevail over security issues, with the latter drawing considerably less attention.

Keywords: *Uzbekistan – the European Union – cooperation – the Agreement on Extended Cooperation – economy – security* ..... 102

## Defense and Security

*Kuchinskaya M. E.* Hybridization of Modern Conflicts Phenomenon: the Russian and the Western Military-Political Discourses.

Academic discussions on the concept of modern conflicts hybridization are going on in the Russian and the foreign specialized literature. The majority of experts agree that a new type of international warfare and effective strategic non-nuclear deterrence has been developed in recent years. Now it provides an exceptional combination of military and non-military impact on an adversary. In this respect, the USA and NATO have been engaging in subversive activities and secret aggressive hybrid operations against Russia, striving to enforce their global dominance.

Keywords: *hybrid threats – hybrid operations – the USA – NATO – "gray zone" conflicts – a system of informational and psychological warfare* ..... 122

## Economy

Actual trends of blockchain market projects development and prospects for cryptocurrencies ..... 144

*Genkin A. S.* Current Issues of Cryptoassets Market Regulation.

Blockchain technology application on various asset types has gained a world scale, and that demands new specific rules of the market regulation. The report comprehensively studies objectives and tasks for such an action, analyzing recent trends and conceptual approaches to cryptomarket regulation including the principle of technological neutrality. The author observes the best up-to-date practice of that regulation basing on France, Malta, and the USA examples. The issues of Russian legal configuration of cryptomarket regulation and prospects for its self-regulation are analyzed here, proposing also some practice recommendations.

Keywords: *blockchain – cryptocurrencies – market – regulation – technology – tools – sector – investor* ..... 145

The author explores a smart contract applicability for neutralizing knowledge asymmetries in projects designed for developing and stimulating participants' cooperation. Opportunities for smart contract integration with a cost factors model are analyzed here, emphasizing its benefits.

Keywords: *smart contract – DAO – asymmetry of knowledge – management system – innovations – cost factors model* ..... 169

## History

*Podchasov N. A.* Russia's System of Southern Frontier Defenses in the Second Half of the XVIth Century: a Reflection in Public Register Books.

The Southern frontier defense was one of the top strategic issues for the recently formed Russian state in the second half of the XVIth cent. The security of the inner territories of the country relied heavily on the steppe frontier defenses, which effectiveness therefore was vital for its economic and social life. That problem solving demanded the entire people's commitment, affecting both the elite's way of life and the military arts development. The author embarks on documental sources analysis from the Order-in-charge (Razryadny) Prikaz, which was the chief military department at that time. He claims to improve an understanding of the Southern Russian system of defenses thereat.

Keywords: *frontier defense – the XVIth century – public register books – the Order-in-charge (Razryadny) Prikaz – the sovereign's order in charge (Razryad)* ..... 191
