RISS Reports

Transformation of European Political Landscape and Parties Under the New World Order.

The report observes the ongoing transformation process of the European party system and political landscape. The authors present factors which influence the ideological evolution of political organisations in the main EU states. The role of new parties, unconventional for the European political landscape is also analyzed here. The authors undertake a forecast of possible future development of the EU in the context of growing Eurosceptic sentiment.

Keywords: *the European Union – debt crisis – migration crisis – Brexit – the United Kingdom – Germany – Austria – France – Spain – Italy – Visegrad group – political party – Euroscepticism* 13

International Policy

Lobov R. N. Relations Between the Republic of Korea and Southeast Asian Countries.

The significance of political and economic ties with Southeast Asia has been constantly growing for the Republic of Korea during the recent decade. The governing administration of president Moon Jae-in has recently launched an initiative of the "New Southern Policy" aimed at strengthening cooperation with the regional states against the background of the intensifying U.S.-China rivalry.

New Eurasia

Baum V. V., Degtyaryov D. A., Zyabkina E. I. 10 years without Diplomatic Recognition: an Application Analysis of Russia-Georgia Bilateral Relations (2008–2018).

The article undertakes an application analysis of Russia-Georgia bilateral relations during the 2008–2018 period. An event analysis based on the GDELT system has

been used as a main methodological tool here as well as a survey of bilateral trade and economic ties dynamics. Basing on the survey results, the authors come to conclusion that cooperation between the countries, especially in economy, went on contrary to diplomatic relations breakdown. However, the Russian-Georgian economic ties has gone through some low periods, which qualitative analysis and causes of occurrence have been reported in this article.

Popov D. S. Tajikistan-China Current Bilateral Relations: Issues and Prospects.

China has been actively bolstering its presence in Tajikistan, viewing the republic as an important direction of its Central Asian policy. It has achieved the most success in promotion of bilateral economic projects, but also the growing Chinese presence in the republic's security and humanitarian spheres has been noted in this article.

Keywords: *China – Tajikistan – Central Asia – Afghanistan – One Belt, One Road* 87

Mordvinova A. E. Central Asian Republics' Membership in the WTO: Issues and Prospects for Cooperation.

The article observes the record of interaction between Central Asian countries and the World Trade Organization. The author systematizes the chain of events and requirements faced by the republics in the process of accession to the organization, noting key advantages for such a membership. Issues for further cooperation between Central Asian states and the WTO as well as its continuing impact on the regional economy are also laid out in the article.

Defense and Security

Gubin A. V. The Architecture of the U.S. Presence in the Indo-Pacific Region: Ballistic Missile Defense Aspects.

The U.S.-China strife has lead to escalation of tensions in political, economic, military, technological, and ideological spheres. The Indo-Pacific region concept has been actively promoted by the U.S. as an alternative to China-centered

regional system of international relations, basing on it some of the recent White House's practical policy decisions. Under these circumstances, the ballistic missile defense system – a pillar of the American military and strategic dominance – may be subjected to significant change. This system's tasks are nowadays defined not only by the necessity of the U.S. territory protection from a possible Russia's strike, but also from China's growing military might as well as from a recently gained North Korea's ballistic potential. Moreover, the regional BMD component's importance has grown recently due to necessity for fulfillment of the U.S. allied obligations as well as desire for altering the regional power balance in Washington's favor.

Keywords: *the USA – Asia-Pacific Region – China – India – Russia – ballistic missile defense – threats* 120

Economy

Vorotnikov A. M., Bazhenov I. N., Lyzhin D. N. Eco-Techno Parks: Prospects for Development, Priority Areas, and Provision of Finance.

Eco-techno parks have become a new direction of development for science and technology parks. Their worldwide emergence is determined by a growing demand for innovative solutions of urgent ecological problems. Residential and industrial wastes treatment has become one of the priority spheres for eco-techno parks employment. Specific "green" financial instruments have demonstrated a substantial potential for providing funding for such projects.

Keywords: *eco-techno parks – innovations – waste treatment – "green" bonds – sustainable development* 144

Kireev A. A. Structural Stimuli and Limitations for the Russian Policy of Developing Its Far East.

Development institutions became a key instrument for Russia's policy of modernizing its Far East region during the 2010ies. However, their functioning has encountered many issues which forced the authorities to repeatedly correct targeted parameters for these institutions. The authors recommend conducting an analysis of structural environmental factors before realization of the development institutions' mandate. The article aimed at defining the aforementioned organizations' desirable ways of localization, specialization and shaping their institutional design basing on a quantitative evaluation of stimuli and limitations for the Far East region.

Keywords: *development policy – development institutions – structural environmental factors – the Russian Far East – Northeast Asia* 156

Dodonov V. Y. Kazakhstan's Economic Model Transformation during the Period of Low Oil Prices.

Stagnating and declining oil prices caused changes in Kazakhstan's economic model. In the author's opinion, these changes may be regarded as transformation of the type of the national economic model, resulting from the main growth drivers shift. The oil factor in the GDP growth has been gradually substituted by the debt one which came amid declining economic growth rates in the period of stable and declining oil prices as well as overall export value contraction and the public debt expansion. The author comes to conclusion that the republic's economic model has transformed from the resource-based to the debt-based type. That transformation determines Kazakhstan's gloomy prospects for the future socio-economic development and fraught with risks of the public finances' destabilization in the mid-term.

Keywords: *public debt – resource-based economy model – public debt servicing – budget process – budget deficit – debt-based economic growth model 172*

Opinion

Zhavoronkova N. G., Shpakovsky Y. G. Russia's New Energy Security Doctrine: the Strategic Planning Issues.

The article presents an analysis of the fundamental principles of Russian Federation's Energy Security Doctrine (2019). The authors' view on substance, content, and purpose of strategic planning documents as well as their role in political governance is stated here. Methodological approaches to building an hierarchy of strategic planning policy documents (concepts, doctrines, strategies) are fully explored in the article.
